

The Oregon Coast
Education Program presents
**Weathering
Climate Change**

Workshop for Educators

Use the ocean, coast, and meaningful watershed education experiences to explore climate change with students in grades 3-8

OCEP Comes to You!

Weathering Climate Change OCEP Workshop

Lane Education Service District

1200 Hwy 99, Eugene, OR

Saturday, January 23, 2016, 9am – 12pm

Register at <http://tinyurl.com/OCEP-Eugene>

It can be difficult for students to understand how scientists know the Earth's climate is changing when the weather changes every day.

Through professional development workshops and online modules, the Oregon Coast Education Program helps educators teach about our state's watersheds, coasts and the ocean. This winter, OCEP travels inland to share lessons and best practices from its newest education module focused on climate change as well as topics from Modules 1 & 2. We'll share age-appropriate activities that will engage your students in science and engineering practices, citizen science projects, and that align with Next Generation Science Standards.

Participating teachers will receive a \$50 stipend plus materials. Space is limited.
