

The Oregon Coast
Education Program presents
**Water Quality
Science**

Workshop for Educators

Use the ocean, coast, and meaningful watershed education experiences to explore water quality with students in grades 5-8

OCEP Comes to You!

Water Quality Science Workshop

High Desert Museum

Bend, OR

Saturday, March 12, 2016, 9am – 12pm

Register at <http://bit.ly/1PABEtK>

Through professional development workshops and online modules, the Oregon Coast Education Program helps educators teach about our state's watersheds, coasts and the ocean. This winter, OCEP joins with the online student data network StreamWebs to share best practices for bringing students into the field to collect and share water quality data. Emphasis will be placed on preparing students for a field experience, using Vernier equipment outdoors, and analyzing data back in the classroom, all while making connections to Next Generation Science Standards.

Participating teachers will receive a \$50 stipend plus materials. Space is limited.
